

PAYIN (Direct – UPI & QR with UPI Intent)

content type: application/json

method: POST

production url: <https://api.securepayzone.com/api/request/create>

PAYIN request can be generated in two ways:

- Direct (seamless)
- Redirect (merchant hosted)

PAYIN (Direct) Request Parameters:

Parameter	Datatype	Required?	Information
request_mode	String	Yes	Mode of request. Ex: payin
request_payload	Main Object	Yes	Request payload according to request mode
request_payload.request_authkey	String	Yes	Auth key provided by us
request_payload.request_flow	String	Yes	Request flow. Ex: direct
request_payload.request_payment_method	String	Yes	UPI or BANKTRANSFER or QR or CARD
request_payload.payment_method_payload	Child Object 1	Conditional	Payment method payload
request_payload.payment_method_payload.upi_id	String	Conditional when payment method is UPI	Customer vpa or upi id
request_payload.payment_method_payload.bank_mapping_code	String	Conditional when payment method is BANKTRANSFER	Bank mapping code provided by us
request_payload.payment_method_payload.card_holder_name	String	Conditional when payment method is CARD	Customer Card information
request_payload.payment_method_payload.card_type	String	Conditional when payment method is CARD	Customer Card information
request_payload.payment_method_payload.card_number	String	Conditional when payment method is CARD	Customer Card information
request_payload.payment_method_payload.expiry_month	String	Conditional when payment method is CARD	Customer Card information
request_payload.payment_method_payload.expiry_year	String	Conditional when payment method is CARD	Customer Card information
request_payload.payment_method_payload.cvv	String	Conditional when payment method is CARD	Card cvv
request_payload.request_signature	String	Yes	Encryption signature

request_payload.customer_payload	Child Object 2	Yes	Customer payload
request_payload.customer_payload.first_name	String	Yes	Customer first name
request_payload.customer_payload.last_name	String	Yes	Customer last name
request_payload.customer_payload.email	String	Yes	Customer email
request_payload.customer_payload.mobile	String	Yes	Customer mobile number
request_payload.customer_payload.address	String	No	Customer address
request_payload.customer_payload.city	String	No	Customer city
request_payload.customer_payload.state	String	No	Customer state
request_payload.customer_payload.country	String	Yes	Customer country code (2 characters only) Ex: US, IN, UK
request_payload.customer_payload.postal_code	String	No	Customer postal code
request_payload.customer_payload.ip_address	String	Yes	Customer ip address
request_payload.payment_payload	Child Object 3	Yes	Payment payload
request_payload.payment_payload.payment_ref_id	String	Yes	Merchant unique payment id for each transaction
request_payload.payment_payload.request_amount	Decimal	Yes	Amount
request_payload.payment_payload.currency	String	Yes	Currency code (3 characters only) Ex: USD, INR, EUR
request_payload.payment_payload.notification_url	String	Yes	Notification url (to get notification about new status)
request_payload.risk_payload	Child Object 4	Yes	Risk payload
request_payload.risk_payload.category_class	String	Yes	Customer category VIP or NonVIP
request_payload.risk_payload.device_fingerprint	String	Yes	Device fingerprint data.
request_payload.custom_field1	String	No	Custom field
request_payload.custom_field2	String	No	Custom field
request_payload.custom_field3	String	No	Custom field
request_payload.custom_field4	String	No	Custom field
request_payload.custom_field5	String	No	Custom field
request_payload.custom_field6	String	No	Custom field
request_payload.custom_field7	String	No	Custom field
request_payload.custom_field8	String	No	Custom field
request_payload.custom_field9	String	No	Custom field
request_payload.custom_field10	String	No	Custom field

Use **SHA256** algorithm to create request_signature.

Plaintext to generate request_signature for **UPI**

```
(
    request_payload.request_authkey||
    request_payload.payment_method_payload.upi_id||
    request_payload.payment_payload.payment_ref_id||
    request_payload.payment_payload.currency||
    (request_payload.payment_payload.request_amount * 100)||
    secretkey
)
```

Ex:

Plaintext for **UPI** = db2f0195-05f3-442e-a046-623a38faa402||8798576858@paytm||332323||INR||1000||20c13a7f-15bd-485c-9793-38c7f78345e7

SHA256 result will be:

ee116cded3c604bcd346ba531e09756ca1da07e4963227798f4ac3f4f65ec18

Plaintext to generate request_signature for **BANKTRANSFER**

```
(
  request_payload.request_authkey||
  request_payload.payment_method_payload.bank_mapping_code||
  request_payload.payment_payload.payment_ref_id||
  request_payload.payment_payload.currency||
  (request_payload.payment_payload.request_amount * 100)||
  secretkey
)
```

Plaintext to generate request_signature for **CARD**

```
(
  request_payload.request_authkey||
  request_payload.payment_payload.payment_ref_id||
  request_payload.payment_payload.currency||
  secretkey
)
```

PAYIN (Direct) Response Parameters:

Plaintext for **BANKTRANSFER** = db2f0195-05f3-442e-a046-623a38faa402|| IDP001
||332323||INR||1000||20c13a7f-15bd-485c-9793-38c7f78345e7

SHA256 result will be:

cbac61faf2db7e854d78753f2f54728cb1ffb894bd90bf357883f9aec0eff66a

Plaintext to generate request_signature for **QR (With UPI Intent)**

```
(
    request_payload.request_authkey||
    request_payload.payment_payload.payment_ref_id||
    request_payload.payment_payload.currency||
    (request_payload.payment_payload.request_amount * 100)||
    secretkey
)
```

Ex:

Plaintext for **QR (With UPI Intent)** = db2f0195-05f3-442e-a046-
623a38faa402||332323||INR||1000||20c13a7f-15bd-485c-9793-38c7f78345e7

SHA256 result will be:

2a3fd77d5c5d08b5a7ab34906f65ec27036643bc2905ef537dfc6c5a10c592f0

Key notes:

- secretkey will be in lower case. (it will be provided by us)
- Multiply amount with 100.

Ex:

Parameter	Datatype	Information
request_mode	String	Mode of request. Ex: payin
success	Bool	True for false
error_result	List object	List of errors
error_result.error code	String	Error code
error_result.error message	String	Error message
response_payload	Main Object	Response payload according to request mode
response_payload.request_authkey	String	Authkey
response_payload.request_flow	String	Request flow (direct)
response_payload.request_payment_method	String	UPI or BANKTRANSFER or QR
response_payload.response_signature	String	Response signature
response_payload.payment_result	Child Object 1	Payment result
response_payload.payment_result.payment_id	String	Our unique payment id
response_payload.payment_result.payment_status	String	Payment status (CAPTURED, FAILED or AWAITING)
response_payload.payment_result.payment_created date	String	Payment created date (2024-05-01 15:00:45)
response_payload.payment_result.payment_amount	Decimal	Amount
response_payload.payment_result.payment_ref_id	String	Merchant unique payment id for each transaction
response_payload.payment_result.currency	String	Currency code (3 characters only) Ex: USD, INR, EUR
response_payload.payment_result.payment_response_code	String	Response error code
response_payload.payment_result.payment_response message	String	Response message
response_payload.payment_result.payment_html	String	For QR with UPI Intent you will get QR string in base64 encoded format, you will need to decode it and set in image tag to show on screen.
response_payload.payment_result.payment_link	String	For QR with UPI Intent you will get upi intent link in base64 encoded format, you will need to decode it and put in anchor tag to generate intent link.
response_payload.custom_field1	String	Custom field
response_payload.custom_field2	String	Custom field
response_payload.custom_field3	String	Custom field
response_payload.custom_field4	String	Custom field
response_payload.custom_field5	String	Custom field
response_payload.custom_field6	String	Custom field
response_payload.custom_field7	String	Custom field
response_payload.custom_field8	String	Custom field
response_payload.custom_field9	String	Custom field
response_payload.custom_field10	String	Custom field

- When you get status as **FAILED**; it means payment was failed due to any reason.
- Final status will be **FAILED** or **CAPTURED**; you will be notified by us for the final status on given **notification_url**.

Use **SHA256** algorithm to create response_signature for **UPI**.

Plaintext to generate response_signature

```
(
  response_payload.request_authkey||
  response_payload.payment_result.payment_ref_id||
  response_payload.payment_result.payment_id||
  response_payload.payment_result.payment_status||
  response_payload.payment_result.currency||
  (response_payload.payment_result.payment_amount * 100)||
  secretkey
)
```

PAYIN (Direct) Response Parameters:

db2f0195-05f3-442e-a046-623a38faa402||332323||54643543||AWAITING||INR||1000||20c13a7f-15bd-485c-9793-38c7f78345e7

SHA256 result will be:

3011e50ffcac58b12de7fde2c342926d439501bec0c23cbf08743649f8c9532a

Use **SHA256** algorithm to create response_signature for **QR (with UPI intent)**.

Plaintext to generate response_signature

```
(
    response_payload.request_authkey||
    response_payload.payment_result.payment_ref_id||
    response_payload.payment_result.payment_id||
    response_payload.payment_result.payment_status||
    response_payload.payment_result.currency||
    (response_payload.payment_result.payment_amount * 100)||
    response_payload.payment_result.payment_link||
    response_payload.payment_result.payment_html||
    secretkey
)
```

Ex:

db2f0195-05f3-442e-a046-623a38faa402||332323||54643543||AWAITING||INR||1000||d89sf79sd87f98sd9f7||sd564fsd45f45sd6f5sd4f45sdfsdf||20c13a7f-15bd-485c-9793-38c7f78345e7

SHA256 result will be:

107ac14c622e6a0b009e2a65b5bf001e9f4df09ccacd25e1b9716c8b0cb42bcf

Key notes:

- secretkey will be in lower case. (it will be provided by us)
- Multiply amount with 100.
